### Job Application for Computer Support Technician

Dear Mendocino Unified School District,

### About Me

During my high school years I was home-schooled and attended the Santa Rosa Junior College as part of the High School Enrichment Program. I started by taking the beginning computer courses where I met fellow students who hired me to tutor them about computers, then to repair and build their computers. Since then I have continued working on computers as both a hobby and a side-job. After graduating from my undergraduate program I returned to the SRJC to study computer architecture and programming, allowing me to have a deeper understanding of computers and how they function.

### Why Mendocino Unified School District?

Though I am from Santa Rosa, my immediate family is from Fort Bragg, and the entire Northern California Coast from San Francisco to Oregon. I have always felt a strong connection to the people, cultures and landscapes of this wondrous corner of our World. Mendocino has given me the opportunity to expand my skill-sets and grow as a person, and I want to return these gifts by helping the local community and people with my skills and abilities.

### Why Me?

I have a deep passion for learning, believing that education is a part of our life's journey and that we should never stop growing. That helping others is the best way for us to use our knowledge to contribute back to society. I enjoy the process of solving problems through research and critical thinking, and would enjoy the opportunity to help my local community with Mendocino Unified School District.

Sincerely,

**Joshua P. Barnard**
